-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the response filed 21 February 2006 is acknowledged.
2. Claims 6-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected groups, there being no allowable generic or linking claim.

Information Disclosure Statement

3. The information disclosure statement filed 14 April 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The blacked out documents have not been considered while the initialed items have been considered due to a copy of those items were received in the file. Also it appears that two copies of the same IDS has been submitted. All of the duplicate references have been blacked out to avoid confusion.

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: In Figure 4a, item "h". (It is noted that h' and h" are in the specification but h is not). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment

Art Unit: 3724

to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "14" has been used to designate both the bottom surface of die 3 (page 6 line 2) and the bottom surface of the metal plate 7 (Page 6 line 32). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Maceyka (3,358,538). See page 6 of this Office action for examiner added reference numerals.

In regards to claim 1, Maceyka discloses the same invention including a punch (12) and die (10) for forming a hole in a metal plate (13), a die body defining a vertical through bore extending between a top and bottom surface of the die (11), a horizontal extending ridge formed on a first portion of a wall of the bore capable of engaging a portion of a work piece and capable of tipping the work piece away from a face of the punch (15), and a partially circumferential relief formed on a second portion of the wall substantially opposite from the horizontally extending ridge capable of facilitating the tipping (17).

In regards to claim 3, Maceyka discloses the partially circumferential relief defines a relief area extending between the circumferential relief and the bottom surface of the die (17 and Fig. 1).

In regards to claim 4, Maceyka discloses the horizontal extending ridge and the partially circumferential relief are formed by offset overlapping (16 and Fig. 2) upper (100) and lower bores (200).

In regards to claim 5, Maceyka discloses the lower bore is larger than the upper bore (200 is clearly larger).

Allowable Subject Matter

8. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

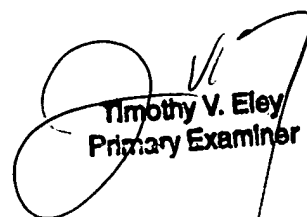

Conclusion
